📞 WhatsApp: 0307-5630721

This path is designed to quickly build a strong foundation in PHP and Laravel, covering core skills with practical projects.

Month 1: PHP Fundamentals 🗂️

Goal: Build a strong foundation in PHP programming.

Key Topics:

• PHP Setup: Installing XAMPP/WAMP and configuring PHP.

• Basics: Syntax, variables, data types, operators.

• Control Flow: if-else, loops (for, while).

• Functions: Creating and using functions.

• Hands-on: Build a simple contact form.
